# Teacher introduction

Assalam O Alaikum 8th grade team. My name is Tehmina Bilal and I will be teaching middle school Math. This is my 11th year at ISI and yes, I do love being a part of this special school :)

I have a Masters degree in Public Administration and certified to teach in the state of Texas.

In my spare time I love to cook for my family and friends. Traveling is another one of my favorite things to do.

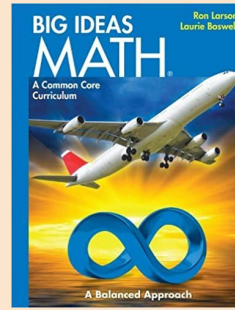

# Pre Algebra

Textbook resource: Big Ideas  
Common core.

Students have online access to the  
textbook.

Supplies needed:

- Graphing calculator
- One notebook

Our focus will be on:

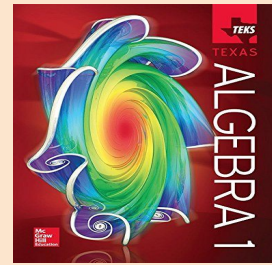

- Solving equations
- Transformations
- Linear equations
- Pythagorean theorem
- Financial analysis

# Algebra 1 coursework

Textbook resource: Algebra 1 Texas edition- Mc Graw Hill (E book available).

Supplies needed:

- Graphing calculator
- 2 notebooks

Algebra 1 is a high school credit course. Students will earn one full credit at the end of the school year. Half credit is earned in each semester if the students earns a passing grade of at least 70%.

We will focus on linear equations, quadratic equations and system of equations.

# Class expectations and reward system

Students can earn auction bucks for good work . An auction will provide the students with an opportunity to bid on and win homework passes or bonus points on tests/homework/class work.

If a child is not meeting class behavior expectations then parents will be called and together we can solve the problem insha Allah.

In our class we all will:

- Be respectful (No. 1 rule!)
- Turn in work on time ( students lose 10 points each day for late work)
- Give it our best (Hard work is greatly appreciated)
